Infrasound is simply sound below the human's hearing range, typically below 20 Hz. At such low frequency a true sound wave causes the local pressure to go up and down and is distinguished from air movement.

In electrical engineering and control theory, a Bode plot /  $\hat{E}^b o\check{S} d i$  / is a graph of the frequency response of a system. It is usually a combination of a Bode magnitude plot, expressing the magnitude (usually in decibels) of the frequency response, and a Bode phase plot, expressing the phase shift.. As originally conceived by Hendrik Wade Bode in the 1930s, the plot is an asymptotic ...

A constellation diagram is a representation of a signal modulated by a digital modulation scheme such as quadrature amplitude modulation or phase-shift keying. It displays the signal as a two-dimensional xy-plane scatter diagram in the complex plane at symbol sampling instants. The angle of a point, measured counterclockwise from the horizontal axis, represents the phase shift of the carrier ...

Fundamentals of Engineering Electronics, William Dow, 1937, 617 pages - Courtesy of an anonymous donor. A very unassuming title for a 617-page engineering book! The first part of the book has a rather in-depth treatment of vacuum tube operation, and details of amplifier circuit design.
