Numerical methods - JohnDFenton

A numerical method is said to be convergent if the numerical solution approaches the exact solution as the step size h goes to 0. More precisely, we require that for every ODE (1) with a Lipschitz function f and every $t^* > 0$, $\forall \epsilon > 0, \exists \delta > 0$ such that $\forall h < \delta$, $\forall t \in [0, t^*]$, $|\hat{y}(t) - y(t)| < \epsilon$. All the methods mentioned above are convergent.

Numerical methods for ordinary differential equations

Numerical analysis is the study of algorithms that use numerical approximation (as opposed to general symbolic manipulations) for the problems of mathematical analysis (as distinguished from discrete mathematics). Numerical analysis naturally finds application in all fields of engineering and the physical sciences, but in the 21st century also the life sciences, social sciences, medicine ...

2 NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS Introduction Differential equations can describe nearly all systems undergoing change. They are ubiquitous in science and engineering as well as economics, social science, biology, business, health care, etc.

Pavel, I just wanted to say how much I enjoyed finding this resource as I am taking my first course in numerical differential equations. I am having some confusion based on the definitions for the central difference operator that I am given and the one you are using.

Hi Pavel. Nice work. I'm using it now to compute the velocity of a robot (MBARS) and your methods give very good results. I'd like to know if you have the formula of a one-sided version, as using a centered version forces me to introduce a time lag.

Journal of Computational Physics has an open access mirror journal Journal of Computational Physics: X, sharing the same aims and scope, editorial team, submission system and rigorous peer review. The Journal of Computational Physics focuses on the computational aspects of physical problems. The scope of the Journal is the presentation of new significantly improved techniques for the numerical ...
